Description

This book has been divided into two parts. The learning outcomes from each are as follows:

PART -1

The reader will gain awareness of how fraudsters:

- acquire one-time passwords via social engineering to commit OTP- based crimes.
- exploit vulnerabilities to create false ATMs.
- take advantage of poor over-sight mechanisms to remain undetected.
- exploit air gaps to manipulate data in transit for fraud.
- mislink accounts in a cross-institutional content to syphon off funds.
- launder stolen proceeds.
- take advantage of default configurations to gain unauthorized network privileges and how to devise counter-measures to deter such frauds.

PART -2

The Reader will gain awareness of how:

- hackers break into android smartphones to steal OTP and other confidential information
- encrypted information to and from your smartphone or computer can be intercepted
- the computer can be hacked with or without social-engineering
- websites are scanned for vulnerabilities and exploited
- enemy computers are

targeted in cyber wars - Security Operations Centers function and tactical and policy measures to counter such threats.
